

CMHC Eco Plus & Eco Improvement — Green Mortgage Premium Refund Reference Note

Source: Canada Mortgage and Housing Corporation (cmhc-schl.gc.ca), current for 2026. CMHC Eco Plus offers a 25% partial refund of the mortgage loan insurance premium to CMHC-insured borrowers who buy an energy-efficient home — a direct reduction of the CMHC premium that applies when the down payment is below 20%.

As of July 8, 2025, CMHC Eco Plus is available only for newly built homes that have an energy-efficiency certificate or rating. Eligibility is assessed using the Natural Resources Canada (NRCan) EnerGuide Rating System and the home must meet the energy efficiency target.

CMHC Eco Improvement offers the same 25% partial premium refund to borrowers who buy an existing home and make energy-efficient improvements to it.

To claim, eligible borrowers have up to two years after closing the mortgage to submit the refund request and supporting documentation directly to CMHC.

Cost-of-ownership angle: because Meridian's engine computes the CMHC insured premium as a real cost, a 25% Eco refund is a concrete sustainability-linked saving — buying or upgrading to an energy-efficient home lowers both the premium and ongoing energy bills.
